Work Experience

Moru-Digital Wallet Internship: August, 2023 Feb, 2024

- 6_months internship on developing and maintaining responsive web applications using React, Next.js, Vector database(pinecone), Open AI, Llama2, Replicate-Ai , MySQL, elevenlabs.io.
- Problem solving & exploring new technologies and best practices.

Machine Learning and Deep Learning courses: Feb, 2024 Present

- I recently decided to switch my carrier to AI engineer. I have finished extensive machine learning online course on Udemy by Super DataScience team. So, I have almost finished Deep learning and am in the middle of Mathematical foundation courses provided ZTM online academy and Super DataScience Team. I have completed many real world project like food vision and Skimlit NLP project in the process with Deep learning (please check my GitHub repo on deep learning to check out my projects). I have some understanding and done projects and fine tuned on LLM (especially on Llama-3b-instruct) on my own custom dataset. I am planning to master reinforcement learning, Deep reinforcement learning, Deep Q learning in future.
- ➔ Please check my GitHub to track my progress. [Rajeeb321123](https://github.com/Rajeeb321123) ([CosmicXplore Rajeeb](https://github.com/CosmicXploreRajeeb)) (github.com)

Description

- After graduating with degree in Computer Engineering, I decided to pursue my passion for programming and Artificial Intelligence. I started taking courses in coding and problem solving and learnt full stack web development. I have developed more than 15 personal projects where accumulate experience in developing web_ applications. I am always eager to expand my skills and knowledge. My favorite part of programming is the problem-solving. My core stack is React, Next.js, Typescript, Node.js and MySQL.
- My true passion lies with Artificial intelligence and Machine learning. I am specially focused on Deep learning. Iam looking for an opportunity to join a dynamic and innovative team where I can contribute to the development of cutting-edge software Ai solutions and grow as a professional.

Education

Computer Engineering,

Tribhuvan university 2018-2023

Personal details

Nationality

Nepalese

Major Skills

Machine & Deep learning
Linear Regression
Classification
Mathematical Foundation
TensorFlow
Recurrent Neural Network
Convolution Neural
Network
Multi-model Neural
Network
Transfer learning
Transformers
NLP & Deep NLP
HuggingFace
Fine tuning
Vector Database
LangChain
Python
NumPy
JavaScript
React
Pandas
TypeScript
Next.js

*Ai Engineer & Full Stack
Development*
